

## About Lyngdorf Audio

Lyngdorf Audio develops, designs, and creates products for high-performance audio enthusiasts seeking the highest quality, most exciting components on the market. Lyngdorf Audio products do not re-produce music; they re-play music with all original passion and musicality intact. The brand is known throughout the world as the leader in high-performance digital audio.

Based in Denmark, Lyngdorf Audio was founded by Peter Lyngdorf, one of the most forward-thinking audio visionaries of our time. Lyngdorf has long been recognized as an innovator in the audio field and as a pioneer of new technologies, including the world's first fully digital amplifier, the Millennium. He has held a lifelong passion for audio perfection that set him on an early path toward audio system research, development, design, and manufacturing.

Today, Lyngdorf Audio's R&D department spearheads advances in the sound industry and through these efforts has set a new standard in audio engineering. Every tool the company develops provides a measurable improvement to the way audio is processed. Lyngdorf offered room correction and 100% digital processing before it was a widely recognized alternative to pure analog products. Applying digital technology to amplification and room correction has changed the face of the audio world. Lyngdorf's proprietary technology RoomPerfect™ can "see" the listening room and adjust audio to fit it. With over 50 claims on new technology, RoomPerfect™ remains the most advanced room correction technology available. Lyngdorf Audio also developed Intersample Clipping Correction to restore clipped signals back to their original shape, thus winning the loudness war and eliminating the brashness associated with clipping.

Through a partnership forged between Peter Lyngdorf and Steinway & Sons, Lyngdorf Audio is also the sister company to Steinway Lyngdorf, the only manufacturer of audio products in the world to win the exclusive endorsement of the legendary American piano manufacturer. Steinway Lyngdorf provides fully integrated digital audio systems that combine design artistry, exquisite craftsmanship, and perfected technology. Lyngdorf Audio is also proud of the licensing partnerships it has forged with select OEMs in the audio industry. With these OEMs, Lyngdorf has found unique partners who share the company's passion for music and the miraculous sensory effect of pure, perfect sound.

**About SL Audio A/S**

SL Audio A/S, dba Steinway Lyngdorf, was founded in Denmark by audio innovator Peter Lyngdorf in 2005 to design, develop, and manufacture sound systems and components under the umbrella of two legendary brand icons: Steinway & Sons and Lyngdorf Audio. The mission of SL Audio A/S is to serve music and film connoisseurs who seek unprecedented innovations in the technology of pure sound. The company pushes the boundaries for audio performance with the development of proprietary new technologies including RoomPerfect™, the world's most advanced room correction system, and true digital amplification which premiered in the ground-breaking Millennium, the first fully digital amplifier in the world. SL Audio A/S markets its products and licenses its technologies to selected worldwide partners and is an original equipment manufacturer for other renowned audio companies.
